SCHEDULE 80 CPVC

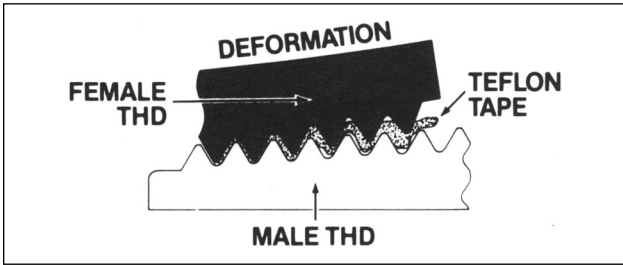

List Prices

Effective:

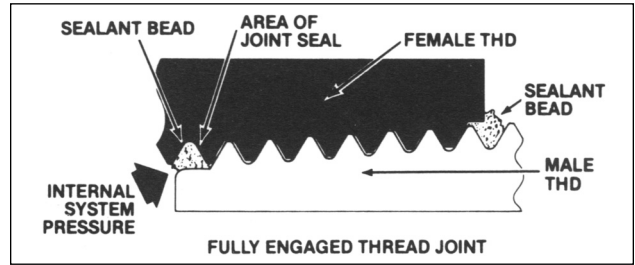

March 27, 2006

(Revised September 2006)

Why LASCO Recommends Sealant in Threaded Joints

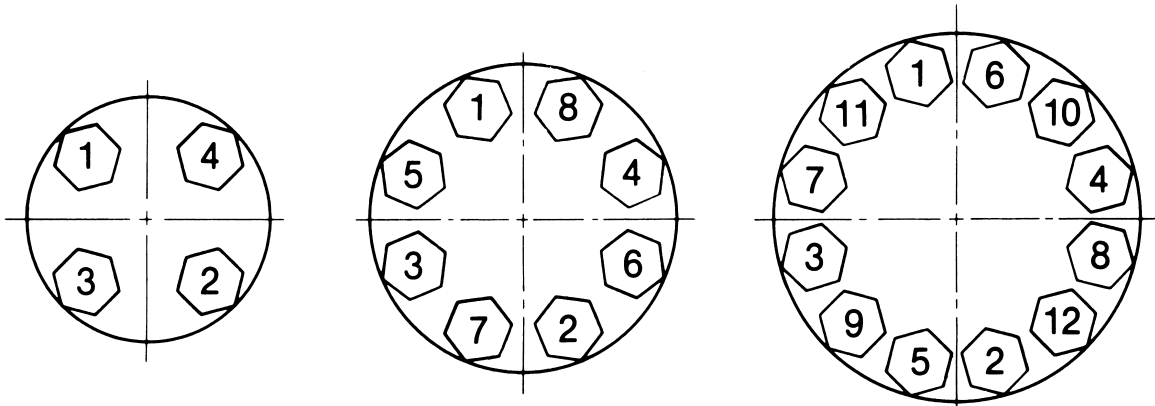

Teflon tape, when compressed between male and female threads in CPVC fittings joints, can cause deformation, leading to leakage, and possibly, to cracked female fittings.

Sealant, when compressed between threads, flows outward to achieve an effective seal against leakage in CPVC fittings.
